I. The Hot Dry Season 2020:

I.1 Financing of agricultural production:

LBA Zone Nord credit committees (1^{er} and 2th) met and the table below summarizes the volume of credit retained for the financing of agricultural production for the Hot Dry Season 2020.

Table 1: Results of the LBA Committees (North Zone) for the Hot Dry Season 2020.

On expressed needs of the order of **10.374 Billion F CFA** (equivalent to **27,066 ha**), the financing program chosen by La Agricultural Bank for the Hot Dry Season 2020 is **8.951 billion CFA francs** corresponding to an area of **23,975 hectares** (Source: LBA / Zone Nord, 2020).

In Bakel, the program adopted by La Banque Agricole to finance production is **1 425 388 F CFA** corresponding to an area of **six (06) ha** (Source: LBA / Zone Est, 2020).

Out of 14 files submitted to the Matam CMS for an amount of **50 614 207 F CFA** corresponding to an area evaluated at **255.70 ha**, all are retained, ie a rate of 100% of completion of the requests received.

In Dagana, **341 ha** and **150 ha** financing agreements were identified respectively with producers affiliated to microfinance CMS and Baobab. However, **8,445.16 ha** financing agreements are registered, on 03/24/2020, with individuals including the funding is qualified as "unconventional".

I.2. Development forecasts (An3 LM12)

The development forecasts for SSC 2020, for the third year of implementation of LM12, are revised downwards and, they on 54,815 hectares of which 91% (50,000 ha) reserved for rice cultivation.

Table 2: Development forecasts and achievements for the Hot Dry Season 2020

Source: Hebdo Monitoring, SAED Delegations, 2020.

On the whole of the Left Bank of the Senegal River, we note an increase of **4,036 ha** for the enhancement of this current campaign of the 2020 SSC compared to the previous season at the same time. Thus, on the scale of the valley, on the date of **April 28, 2020** a increase of **8 percentage points** of rice development, is recorded either **3,816 ha** moreover, in view of the achievements in rice from the SSC 2019 on the same date.

This representation shows a similar trend in the sowing rhythm of the three hot dry seasons of LM12. On the whole of the Left Bank of the Senegal River, the development of this present SSC 2020, compared to the previous dry seasons 2019 and 2018, has started to register a slight increase from March 24, 2020. This graph can also be used benchmark, in terms of forecasting, for harvest calendars.

Thus, arrangements will be made by the SAED authorities, in collaboration with the heads of the Producer Organizations and other partners, for the smooth running of harvest operations.

The hot dry season 2020 has started timidly in the various production areas of the delegations. In fact, early sowing (month of January) occupies a small proportion of cultivated areas. Thus, the rate of sowing intensified beyond February 25, 2020 with a marked increase in the areas sown, particularly in Dagana.

This graph also shows that the enhancement of the Dagana delegation far exceeds that of other delegations. Moreover, most of the cultivated areas throughout the valley are concentrated there. The late start of the campaign, due to the delay in holding the 1^{er} credit committee, had an impact on the crop calendar.

To date, the distribution according to the cropping calendar, of the sowing carried out on the whole of the valley (**48,815 ha**), looks like this:

- **2%** of the areas currently cultivated are sown before February 15, 2020, i.e. **783 ha**;
- Between the date of February 16 to March 17, 2020, are sown **47 %** areas developed, i.e. **23,079 ha**;
- Areas sown beyond March 17, 2020 cover **51%** of the entire development, i.e. **24,953 ha**.

In addition, faced with the situation of the lack of urea, the DRDRs and SDDR, in the various delegations, responded favorably and, measures are taken to meet the needs.

II. The Cold Dry Season 2019_2020:

II.1. Financing of agricultural production:

1^{er} La Banque Agricole's credit committee (LBA / North Zone) met from 02 to 04 October 2019 in Matam, and the financing selected, for this Cold Dry Season 2019-2020 campaign, concerns an amount of **2.124 billion CFA francs**, corresponding to a area of **2,244 hectares (Source: LBA / Zone Nord, 2019)**.

The LBA credit committee (EST network) met on October 10, 2019 and the funding selected relates to an amount estimated at **11 714 862 F CFA**, that is to say an area equal to **23.62 ha** (LBA-East Zone).

In addition, the CMS regional committee met on November 5 and decided to finance the Kollangal locker up to **5,251,024 FCFA**, i.e. an area of **10.28 ha** for the Onion speculation (*Weekly Monitoring Nov-19, Bakel Delegation*)

II.2. Development forecasts and achievements (Year2 LM12):

Forecasts remain dominated by onion, industrial tomato and corn with respectively 41%, 20% and 17% of the revised development targets.

Table 3: Development forecasts and achievements for the Cold Dry Season 2019_2020

Source: Weekly Monitoring, SAED Delegations, SSF 2019/20

In Podor the evacuations of the tomato are drawing to the end at a time when the marketing of onions is experiencing enormous difficulties with the restrictive measures taken by the State as part of the fight against the COVID-19 disease. Solutions, by way of recommendations, are formulated to deal with this situation.

At the level of the Delegation of the Lake, **white onion** and the **Radish** are also practiced on respectively **520** and **220 ha**. It should be noted that also the development of the Cassava speculation occupies an area estimated at 1,509 ha, or 15% of the development of the said delegation. In addition, in the Dagana delegation, onion evacuations started at the end of February. At the start of the marketing, the prices charged were not less than 200 FCFA / kg. However, a slight drop in prices is noted and, variations are noted between the collection points oscillating between 145 F to 200 F / kg. As constraints, a certain slowness in evacuations since the onset of covid 19 disease in Richard-Toll. Insufficient consignment note books, problems of product packaging and the lack of equipment (Pallets, Scales, etc.) at collection points, among others, are also reported as constraints.

III. Wintering 2019_2020:

III.1. Financing of agricultural production:

The credit committees, 1st and 2nd, of La Banque Agricole (North Zone) met, the volume of credit retained, for financing of the agricultural production of the rainy season 2019_2020, is evaluated for an amount of **5.502 billion CFA francs** (Source: LBA / ZONE-NORD, 2019).

In addition, the outputs, provided by the agencies of the northern zone, amount to an amount estimated at **3.029 billion CFA francs** be one area of **10,381 hectares**.

The results of the two credit committees, of the LBA Zone EST, show a financing program of **182 ha** for an amount rated at **65 092 770 F CFA**. (Source: LBA / ZONE-EST, 2019).

III.2. Development forecasts and achievements (Year2 LM12):

The objectives of sowing are estimated at 35,345 hectares of which 30,000 hectares are reserved for rice cultivation, ie 85%.

Table 4: Development forecasts and achievements for the 2019_2020 rainy season
