I. The 2020_2021 wintering campaign

I.1. Financing of agricultural production:

Credit committees (1^{er} and 2th) of La Banque Agricole (North Zone) met, the volume of credit retained for the Financing of the Agricultural Production (FPA) of the winter season 2020_2021, is evaluated for an amount of **5.626 billion CFA francs** corresponding to a area equal to **18,468 hectares** (Source: LBA / ZONE-NORD, August 2020). The table below summarizes the overall summary of the results of the two credit committees.

Table 1: Summary of the results of the credit committees of LBA / North Zone of wintering 2020/2021

In Bakel, the LBA zone / East credit committees met and the volume of credit retained for the APF corresponds to **47.06 ha** for a amount equivalent to **10 069 006 F CFA** and, the CMS has provided funding in the amount of **6 398 876 F CFA**.

In Dagana, the files submitted to the CMS correspond to an estimated area of 18 ha, i.e. an amount of **5 643 750 F CFA**.

Seven (07) credit files for an area of **168.68 ha** thus corresponding to an assessed amount at **33 868 775 F CFA**.

I.2. Development forecasts (An3 LM12)

The objectives of sowing are estimated at 46,130 hectares of which 40,000 hectares are reserved for rice cultivation, ie 87%.

Source: Weekly Tracking, SAED Delegations, au 18_Août 2020.

Land preparation operations are actively continuing throughout the Left Bank of the Senegal River (**19,405 ha** of areas shaped for this current 2020/2021 wintering campaign against **17,483 ha** during the same period of the previous wintering campaign, i.e. an increase of **1,922 ha**). However, the rate of installation of crops is still rather timid, despite an advance of **2,427 ha** (cf. table 2 above) and could thus have an impact on compliance with the cropping calendar. It is nevertheless necessary Note that crop nurseries are being set up in certain production areas.

In addition, the fertilizer requirements, both for rice and for other crops, are evaluated according to the intentions of the plant. in value and by drop point at the level of each delegation.

In Podor, according to rice development intentions, fertilizer requirements are 1,763.41 T for Urea and 587.80 T for DAP. In Bakel, in accordance with the forecasts in the Mission Letter (LM12), the estimated needs are 175 T for urea, 50 T for DAP and 60 T for seeds. On this date, 21 T of rice seeds were received by the SDDR under the emergency program of the State for the municipalities of Ballou, Bakel and Kidira.

In Matam, the implementation rate is currently 71.91% for DAP, 71.39% for urea and 29.86% for triple 15. The rates sales are respectively 27.4% for DAP, 14.5% for Urea and 0% for triple 15 (Source DRDR, 18_08_2020).

However, it is reported in some production areas a delay in the introduction of subsidized fertilizers at supply stores.

Arrangements should be made for a supply of fertilizer in order to anticipate

the inaccessibility of stores in the event of the next rains.

I.3. Monitoring of vegetative state:

The first sowings are behaving well, the vegetative state of the crops is generally satisfactory. In Bakel it is reported that:

- The rice is in the emergence phase;
- Sorghum and corn are in the vegetative phase;
- Chili pepper in the nursery stage.

In Matam, the rice nurseries are mostly set up with an estimated area of 3,416 ha intended for transplanting.

Market gardening nurseries are in the process of sowing, particularly with speculation of chilli for transplanting.

II. The Hot Dry Season 2020:

II.1 Financing of agricultural production:

LBA Zone Nord credit committees (1^{er} and 2th) met, based on expressed needs of the order of **10.374 Billion F CFA** (equivalent to **27,066 ha**), the financing program selected by La Banque Agricole for the 2020 Hot Dry Season is **8.951 billion CFA francs** corresponding to an area of **23,975 hectares** (Source: LBA / Zone Nord, 2020).

In Bakel, the program adopted by La Banque Agricole to finance production is **1 425 388 F CFA** corresponding to an area of **six (06) ha** (Source: LBA / Zone Est, 2020).

Out of 14 files filed with the Matam CMS for an amount of **50 614 207 F CFA** corresponding to an area evaluated at **255.70 ha**, all are retained, i.e. a rate of 100% of the requests received (Source: Weekly Tracking, Matam Delegation).

II.2. Development forecasts (An3 LM12)

The development forecasts for SSC 2020, for the third year of implementation of LM12, are revised downwards and, they on 54,815 hectares of which 91% (50,000 ha) reserved for rice cultivation.

Table 3: Development forecasts and achievements for the Hot Dry Season 2020

Source: Weekly Tracking, SAED Delegations, SSC, 2020.

Harvests are still underway in some production areas of the Left Bank of the Senegal River, a predominance of the Manual harvesting, compared to mechanical harvesting, is noted in some areas like Matam.

Nowadays, **42,340 ha** are collected on the scale of the valley, i.e. an achievement rate of **86%**. Compared to the Hot Dry Season 2019 at the same period, for a development of **45,885 ha** of rice harvests were estimated at **41,771.12 ha** or an achievement rate of **91%**. In addition, with reference to the situation of the development of the hot season 2019 at the same period, we note an overrun of **3,384 ha** sown rice for this 2020 SSC campaign.

However, constraints of unavailability of combine harvesters are reported, but also the high cost combined with the scarcity of labor for harvesting operations causing the late release of plots cultivated in SSC 2020.

III. The Cold Dry Season 2019_2020:

III.1. Financing of agricultural production:

1^{er} La Banque Agricole's credit committee (LBA / North Zone) met from October 02 to 04, 2019 in Matam, and the funding selected, for this Cold Dry Season 2019_2020 campaign, relates to an amount of **2.124 billion CFA francs**, corresponding to a area of **2,244 hectares (Source: LBA / Zone Nord, 2019)**.

The LBA credit committee (EST network) met on October 10, 2019 and the funding selected relates to an amount estimated at **11 714 862 F CFA**, that is to say an area equal to **23.62 ha** (LBA-East Zone).

In addition, the CMS regional committee met on November 5 and decided to finance the Kollangal locker up to **5,251,024 FCFA**, i.e. an area of **10.28 ha** for the Onion speculation (*Weekly Monitoring Nov-19, Bakel Delegation*)

III.2. Development forecasts and achievements (Year2 LM12):

Forecasts remain dominated by onion, industrial tomato and corn with respectively 41%, 20% and 17% of the objectives of enhancement revised.
