Source: LBA / Zone North, 2th credit committee, November 2020

As a reminder, the overall financing of agricultural production retained, for the 1^{er} AML credit committee / north zone, covers an amount of **1.237 billion CFA**, corresponding to an area equal to **1,400 hectares** (Source: LBA / Zone Nord, 1^{er} credit committee, Oct. 2020).

- The cumulative funding for the SSF 2020/2021 campaign retained relates to a total amount of **1.314 billion CFA**, corresponding to an area equal to **1,489 hectares**.

The SSF 2020/2021 credit committees of **LBA / EAST NETWORK** and **CMS / Bakel** are reunited. The total volume of funding retained is rated at **11 057 700 F CFA**, distributed as follows:

- **6,995,100 FCFA** for LBA;
- **4,062,600 FCFA** for the CMS (Source: Hebdo monitoring, Bakel).

I.2. Project development forecasts (YR3 LM12):

Development forecasts remain dominated by onion, industrial tomato and corn with 37%, 19% and 16% respectively development objectives of the twelfth engagement letter (LM 12).

Source: Weekly monitoring, SAED delegations, achievements as of 24. Novembre. 2020

The SSF 2020/2021 campaign is timidly settling down on the entire left bank of the Senegal River with the establishment of nurseries, carrying out cultivation methods and the first sowing. At the same time, the withdrawal of BLPs from the LBA continues.

II. The 2020_2021 wintering campaign

II.1. Financing of agricultural production:

Credit committees (1^{er} and 2th) of La Banque Agricole (North Zone) met, the volume of credit retained for the Financing of the Agricultural Production (FPA) of the winter season 2020_2021, is evaluated for an amount of **5.626 billion CFA francs** corresponding to a area equal to **18,468 hectares** (Source: LBA / ZONE-NORD, August 2020).

II.2. Development forecasts (An3 LM12)

The cultivation objectives are estimated at **46,130 hectares** including 40,000 ha reserved for rice cultivation, or 87%.

Table 3: Development forecasts and achievements for wintering 2020_2021

Source: Weekly Monitoring, SAED Delegations, au. 24 Novembre, 2020.

The development, all speculations combined, of the 2020/2021 wintering amounts to **35,253 ha** i.e. an achievement rate of 76% development objectives. The area cultivated with rice has increased by **1,758 ha** compared to sown rice for the previous rainy season at the same time.

Harvests have started in all the production areas of the valley, on 24-11-2020, an estimated area of **1,932 ha** is already harvested in the Delta, **688.9 ha** in Matam, **1407.12 ha** in Podor and **34.62 ha** in Bakel.

NB 1 : the presence of sucking biting insects, grain-eating birds and rats is reported in almost all areas of the Delta and in Podor, as well as bird pressure in the areas of kobilo, Doumga and Ndouloumadji in the Matam sector. The DPV in collaboration with the field device was able to carry out treatments against grain-eating birds, which considerably reduced pressure on crops.

Cases of disasters for wintering are noted and monitored very closely by the SAED field system.

In the Delta, it is thus listed:

- **3,862 ha** identified damage caused by rats, sucker biters, wild animals and grain-eating birds;
- **1,272 ha** identified by causes of rain flooding.

The monitoring of the evolution of the flood situation in the other production areas is as follows:

- **216 ha** of flooded areas in Podor;
- **165.5 ha** of flooded areas in Matam including 24.75 ha affected.

NB 2 : in the Lac de Guiers area, it is important to note, in addition **4,588 ha** under irrigated crops, that **3,419.8 ha of watermelon** are listed in the field of pluvial.

II.3. Monitoring of vegetative state:

Vegetative development is generally satisfactory although the phenological stage is very heterogeneous because of the elasticity of seedlings. Currently in almost all areas the first harvests have started. The rice is in the harvesting / threshing phase, the sorghum, corn and chilli in the harvest phase.

III. The Hot Dry Season 2020:

III.1 Financing of agricultural production:

LBA Zone Nord credit committees (1^{er} and 2th) met, based on expressed needs of the order of **10.374 Billion F CFA** (equivalent to **27,066 ha**), the financing program selected by La Banque Agricole for the 2020 Hot Dry Season is **8.951 billion CFA francs** corresponding to an area of **23,975 hectares** (*Source: LBA / Zone Nord, 2020*).

In Bakel, the program adopted by La Banque Agricole to finance production is **1 425 388 F CFA** corresponding to an area of **six (06) ha** (*Source: LBA / Zone Est, 2020*).

Out of 14 files filed with the Matam CMS for an amount of **50 614 207 F CFA** corresponding to an area evaluated at **255.70 ha**, all are retained, i.e. a rate of 100% of the requests received (*Source: Weekly Tracking, Matam Delegation*).

III.2. Development forecasts (An3 LM12)

The development forecasts for SSC 2020, for the third year of implementation of LM12, are revised downwards and, they on 54,815 hectares of which 91% (50,000 ha) reserved for rice cultivation.

Table 4: Development forecasts and achievements for the Hot Dry Season 2020
