Source: LBA / Zone Nord, January 2020.

For the withdrawal of BLP from the LBA of Matam, the date of March 15, 2020 is retained as the strict deadline.

However, the expressions of needs formulated by 11 Farmers' Organizations to CMS amount to **196 ha** for an amount assessed at **36 638 207 F CFA**.

In Dagana, **341 ha** and **150 ha** financing agreements were identified respectively with producers affiliated to the CMS and Baobab microfinance. However, **6,655.08 ha** financing agreements are registered, on that date, with individuals whose financing is qualified as "unconventional".

I.2. Development forecasts (An3 LM12)

SSC 2020 development forecasts, for the third year of implementation of LM12, are revised downwards and, they cover 54,815 hectares, of which 91% (50,000 ha) are reserved for rice cultivation.

Table 2: Development forecasts and achievements for the Hot Dry Season 2020

Source: Hebdo Monitoring, SAED Delegations, 2020.

Soil preparation work continues throughout the Left Bank of the Senegal River.

A slight decrease, of **9 percentage points** of rice development, is recorded for this current campaign of SSC 2020 compared to the achievements of the previous hot dry season at the valley level.

The implementation of fertilizers continues in Matam with respectively 40% coverage of urea needs and 72% for the DAP.

Placement of urea and DAP also started in Dagana with rates of 62% and 53% respectively per compared to DRDR forecasts. In addition, four (04) new drop-off points (Ndiawdoune, Polo, Medina Mountaga for the Diawel and Savoigne area) were identified on the basis of polarized development forecasts. The presence of rats is reported in almost all production areas in Dagana. Solutions are recommended by the DPV, in collaboration with the advisory support system for the effective management of this problem.

A delay was also noted in carrying out maintenance work on the axes (Diawel, gorom, Kassack and Lampsar) by the FOMAED and, at the level of records not transferred from Savoigne by FOMPI, which also constitutes a real constraint to development and risk compromising the smooth running of this SSC 2020 campaign.

II. The Cold Dry Season 2019_2020:

II.1. Financing of agricultural production:

1^{er} La Banque Agricole's Credit Committee (LBA / North Zone) met from 02 to 04 October 2019 in Matam, and the funding selected for this Cold Dry Season 2019-2020 campaign involves an amount of **2.124 billion from F CFA**, corresponding to an area of **2,244 hectares (Source: LBA / Zone Nord, 2019)**.

The LBA credit committee (EST network) met on October 10, 2019 and the funding selected relates to an amount rated at **11 714 862 F CFA**, that is to say an area equal to **23.62 ha** (LBA-East Zone).

In addition, the CMS regional committee met on November 5 and decided to finance the Kollangal locker up to of **5 251 024 FCFA**, i.e. an area of **10.28 ha** for the Onion speculation (*Weekly Monitoring Nov-19, Bakel Delegation*)

II.2. Development forecasts and achievements (Year2 LM12):

Forecasts remain dominated by onion, industrial tomato and corn with respectively 41%, 20% and 17% of revised enhancement objectives.

Source: Weekly Monitoring, SAED Delegations, SSF 2019/20

The achievements of the SSF 2019/20, to date, amount to **20,268 ha** or an achievement rate of **117%** objectives revisions of the enhancement of the second year of implementation of LM12, against **16,221 ha** in SSF 18/19 at the same period, an increase of **4,047 ha** areas currently exploited in SSF.

¹ Others: cassava, melon, peanuts, eggplant, watermelon, chili, carrot, cabbage, jaxatu, beans, bissap, banana plantation, fruit trees.

The enhancement of this SSF 19/20 campaign is mainly driven by onion and tomato speculation with, respectively, an estimated coverage of **39%** and **11%** of the total areas developed at this time of the year. Are grown on **783 ha**, by West African Farm (WAF) in the Lac de Guiers area, the Onion speculations white, radish and green bean with respectively 400 ha, 220 ha and 163 ha.

In addition, the marketing of the first onion productions, through certain drop-off points in Podor, is effective, prices currently vary between **8,000** and **9,000 FCFA** the bag, i.e. a price between 200 and 225 FCFA / Kg. In addition, evacuations started with SOCAS on January 29, 2020 and are continuing. However, the start evacuations, agro-industrial Agroline and Takamoul, initially scheduled for around February 25, 2020, will be effective in the next few days. The opening of the Dagana weighbridge is also planned during this SSF 19/20 campaign.

Concerning onions, the farm gate price set by the inter-professional organization is set at **200 F CFA** the kilogram. In addition, the IPOS / Dagana section met on March 03, 2020 at the meeting room of the Dagana delegation, to prepare a tour in onion production areas and level of collection points during the period from March 17 to 24, 2020. However, outbreaks of bacteriosis and Tylc are reported in the production areas of Dagana, Bokhol, Gaé and Ndieurba.

III. Wintering 2019_2020:

III.1. Financing of agricultural production:

The credit committees, 1st and 2nd, of La Banque Agricole (North Zone) met, the volume of credit retained, for the financing of agricultural production for the rainy season 2019_2020, is evaluated for an amount of **5.502 billion CFA francs** (Source: LBA / ZONE-NORD, 2019).

In addition, the outputs, provided by the agencies of the northern zone, amount to an amount estimated at **3.029 billion F CFA** i.e. an area of **10,381 hectares**.

The results of the two credit committees, of the LBA Zone EST, show a financing program of **182 ha** for a amount assessed at **65 092 770 F CFA**. (Source: LBA / ZONE-EST, 2019).

III.2. Development forecasts and achievements (Year2 LM12):

The objectives of sowing are estimated at 35,345 hectares of which 30,000 hectares are reserved for rice cultivation, ie 85%.

Sources: BdD- Socio-economique SAED Final situation Hiv 18/19 & Weekly follow-up of Delegations Hiv 2019/20.

Harvests are complete on the whole of the Left Bank of the Senegal River. Provisional survey results yields, for estimating rice production, are available.

On 147.65 ha are recorded in the area of Pété in Podor, flood disasters and 3.55 ha of abundance in Bakel.

Nevertheless, compared to the development of the previous wintering, all speculations combined, a jump of 8,140 ha are recorded for this 2019/2020 wintering campaign.
