I. The cold dry season 2020_2021:

I.1. Financing of agricultural production

The 2th La Banque Agricole's Credit Committee (LBA / North Zone) met on November 11, 2020 and the financing selected relates to a amount of 77,698,373 F CFA, for an area of 89 hectares.

Source: LBA / Zone North, 2th credit committee, November 2020

As a reminder, the overall financing of agricultural production retained, for the 1^{er} AML credit committee / north zone, covers an amount of **1.237 billion CFA**, corresponding to an area equal to **1,400 hectares** (Source: LBA / Zone Nord, 1^{er} credit committee, Oct. 2020).

- The cumulative funding of the SSF 2020/2021 campaign retained, for LBA Zone / North, relates to a total amount of **1.314 billion CFA**, corresponding to an area equal to **1,489 hectares**.

The SSF 2020/2021 credit committees of **LBA / EAST NETWORK** and **CMS / Bakel** are reunited. The total volume of funding retained is rated at **11 057 700 F CFA**, distributed as follows:

- **6,995,100 FCFA** for LBA, for an area corresponding to **17.5 ha**;
- **4,062,600 FCFA** for the CMS, i.e. an area estimated at **17.5 ha**.

I.2. Project development forecasts (YR3 LM12):

Development forecasts remain dominated by onion, industrial tomato and corn with 37%, 19% and 16% respectively development objectives of the twelfth engagement letter (LM 12).

Source: Weekly follow-up, SAED delegations, achievements as of 01 Décembre 2020

The SSF 2020/2021 campaign is timidly continuing on the entire left bank of the Senegal River with the establishment of market gardening nurseries, carrying out cultivation methods and transplanting onions. Negotiations and intermediation are continuing between POs, the tomato committee and LBA to improve the situation of withdrawals of BLPs from the bank.

We note a drop in the development, for all speculations combined, of this present SSF 2020/21 campaign compared in the previous cold dry season at the same period, i.e., respectively, **1,556 ha** vs **2,634 ha**.

II. The 2020_2021 wintering campaign

II.1. Financing of agricultural production:

Credit committees (1^{er} and 2th) of La Banque Agricole (North Zone) have met, the volume of credit retained for the Financing of Agricultural Production (FPA) for the 2020_2021 rainy season, is assessed for an amount of **5.626 billion CFA francs** corresponding to a area equal to **18,468 hectares** (Source: LBA / ZONE-NORD, August 2020).

II.2. Development forecasts (An3 LM12)

The cultivation objectives are estimated at **46,130 hectares** including 40,000 ha reserved for rice cultivation, or 87%.

Table 3: Development forecasts and achievements for wintering 2020_2021

Source: Hebdo Monitoring, SAED Delegations, au 10. Novembre 2020.

Harvests have started in all production areas of the valley, to date, for rice an area estimated at **3,010 ha** is harvested in the delta, **1,641 ha** in Matam, **2 195 ha** in Podor and **65.31 ha** in Bakel.

NB 1 : the presence of sucking biting insects, grain-eating birds and rats is reported in almost all areas of the Delta and in Podor, as well as bird pressure. The DPV in collaboration with the field system distributed products for the fight against pests, measures are taken to improve crop protection. Constraints linked to flooding were also noted during this campaign.

In the Delta, it is noted as follows:

- **7203 Ha** recorded damage caused by floods, rats, biting-suckers, wild animals and grain-eating birds;
- With the financial support of SAED, the DPV distributed rodenticides;
- K-Optimal insecticide is recommended for the fight against stingers and suckers;
- In addition to rats and sucking biters, avian pressure is reported in almost all Zones;
- The reports of claims related to rats and sucking biters are still in progress, recommendations are thus given to producers for better management of crop protection.

The monitoring of the evolution of the situation in the other production zones is as follows:

- Presence of sucking stinging insects, the presence of grasshoppers (damage observed on the ears of rice) and seed-eating birds from Mauritania in the areas of Thioubalel, Cas-cas, Madina, Golléré, Méry and Pété in the department of Podor;
- 165.5 ha of flooded areas in Matam including 24.75 ha affected.
- The phytosanitary situation is worrying in certain places of Matam with the attacks of the stingers and suckers on the rice. East acquired, with the support of the APEFAM 1 project, by the delegation a treatment product (Benji) for an amount capable of treating 200 ha;

- Threats due to bird pressure reported in the areas of kobilo, Doumga and Ndouloumadji in the department of Matam. In the department of Kanel, thanks to the support of the delegation, the local unit of the DPV carried out treatments against grain-eating birds, which considerably reduced the pressure on the crops.
- Flooding of the Collenghal de Bakel locker, over an area estimated at 88.14 ha and 08.30 ha at the level of the Aroundou PIV, due to relatively high rainfall;
- Difficulties in harvesting mature plots in Sébou, Bangassi and Djimbé (Bakel), caused by the presence of a strong blade water and the lack of a drainage network.

NB 2 : in the Lac de Guiers area, it is important to point out, in addition to an area equal to **4,588 ha** under irrigated crops, that **3,419.8 ha** of watermelon are identified emanating from the field of the pluvial.

II.3. Monitoring of vegetative state:

Vegetative development is generally satisfactory although the phenological stage is very heterogeneous because of the elasticity of the seedlings. Currently in almost all areas the first harvests have started. The rice is in the harvesting / threshing phase, the sorghum, corn and chilli in the harvest phase.

III. The Hot Dry Season 2020:

III.1 Financing of agricultural production:

LBA Zone Nord credit committees (1^{er} and 2th) met, based on expressed needs of the order of **10.374 Billion F CFA** (equivalent to **27,066 ha**), the financing program selected by La Banque Agricole for the 2020 Hot Dry Season is **8.951 billion CFA francs** corresponding to an area of **23,975 hectares (Source: LBA / Zone Nord, 2020).**

In Bakel, the program adopted by La Banque Agricole to finance production is **1 425 388 F CFA** corresponding to an area of **six (06) ha (Source: LBA / Zone Est, 2020).**

Out of 14 files filed with the Matam CMS for an amount of **50 614 207 F CFA** corresponding to an area evaluated at **255.70 ha**, all are retained, i.e. a rate of 100% of the requests received (**Source: Weekly Tracking, Matam Delegation**).

III.2. Development forecasts (An3 LM12)

The development forecasts for SSC 2020, for the third year of implementation of LM12, are revised downwards and, they on 54,815 hectares of which 91% (50,000 ha) reserved for rice cultivation.

Table 4: Development forecasts and achievements for the Hot Dry Season 2020
