Source: Hebdo Monitoring, SAED Delegations, 2020.

Soil preparation work is continuing on the whole of the Left Bank of the Senegal River; **29,923 ha** are shaped for this present campaign against **32,060 ha** in SSC 2019, over the same period, i.e. a decrease of **2,137 ha**. Likewise, a slight decrease in **1 percentage points** of rice development, is recorded compared to achievements of the previous hot dry season across the valley. The rate of sowing is intensifying.

In addition, the noted constraints are, among others, the somewhat late holding of the 1^{er} credit committee due to the weakness of actual reimbursement rate of the 2019 SSC credit and 2019/20 wintering stock consignments, on works

of certain developments (648 ha in Matam), but also on the difficulties of access to quality seeds in certain production areas in Bakel and uncertainty among service providers (Departments of Saint-Louis and Dagana) which require the discharge of the LBA before the start of cultivation methods, in particular with producers' unions. However, notifications of fertilizer quotas from suppliers, by drop-off point, are effective, the implementation is continues in the various production areas.

In addition, four (04) new drop-off points (Ndiawdoune, Polo, Médina Mountaga for the Diawel area and Savoigne) were identified, at the level of the Dagana delegation, on the basis of polarized development forecasts. To this end, the decrees creating these drop-off points have already been made by the Sub-prefect of the district of Ndiaye.

II. The Cold Dry Season 2019_2020:

II.1. Financing of agricultural production:

1^{er} La Banque Agricole's Credit Committee (LBA / North Zone) met from 02 to 04 October 2019 in Matam, and the funding selected for this Cold Dry Season 2019-2020 campaign involves an amount of **2.124 billion from F CFA**, corresponding to an area of **2,244 hectares (Source: LBA / Zone Nord, 2019)**.

The LBA credit committee (EST network) met on October 10, 2019 and the funding selected relates to an amount rated at **11 714 862 F CFA**, that is to say an area equal to **23.62 ha** (LBA-East Zone).

In addition, the CMS regional committee met on November 5 and decided to finance the Kollangal locker up to of **5 251 024 FCFA**, i.e. an area of **10.28 ha** for the Onion speculation (*Weekly Monitoring Nov-19, Bakel Delegation*)

II.2. Development forecasts and achievements (Year2 LM12):

Forecasts remain dominated by onion, industrial tomato and corn with respectively 41%, 20% and 17% of revised enhancement objectives.

Source: Weekly Monitoring, SAED Delegations, SSF 2019/20

The achievements of the SSF 2019/20, to date, amount to **20,093 ha** or an achievement rate of **116%** objectives revisions of the enhancement of the second year of implementation of LM12, against **15,431 ha** in SSF 18/19 at the same period, an increase of **4,662 ha** areas currently exploited.

The enhancement of this SSF 19/20 campaign is essentially driven by onion speculation followed at a distance by tomatoes with, respectively, an estimated coverage of 39% and 11% of the areas developed at that date.

In addition, the marketing of the first onion productions, through certain drop-off points in Podor, is effective, prices currently vary between **8,000** and **9,000 FCFA** the bag, i.e. a price between 200 and 225 FCFA per kilogram.

¹ Others: cassava, melon, peanuts, eggplant, watermelon, chili, carrot, cabbage, jaxatu, beans, bissap, banana plantation, fruit trees.

In addition, evacuations started with SOCAS on January 29, 2020 and are continuing. However, the start evacuations, agro-industrial Agroline and Takamoul, initially scheduled for around February 25, 2020, will be effective in the next few days. The opening of the Dagana weighbridge is planned during this SSF 2019_2020 campaign.

Are grown on **783 ha**, by West African Farm (WAF) in the Lac de Guiers area, the Onion speculations white, radish and green bean with respectively 400 ha, 220 ha and 163 ha.

However, outbreaks of bacteriosis and Thylc are reported in the production areas of Dagana, Bokhol, Gaé and Ndieurba.

III. Wintering 2019_2020:

III.1. Financing of agricultural production:

The credit committees, 1st and 2nd, of La Banque Agricole (North Zone) met, the volume of credit retained, for the financing of agricultural production for the rainy season 2019_2020, is evaluated for an amount of **5.502 billion CFA francs** (Source: LBA / ZONE-NORD, 2019).

In addition, the outputs, provided by the agencies of the northern zone, amount to an amount estimated at **3.029 billion F CFA** i.e. an area of **10,381 hectares**.

The results of the two credit committees, of the LBA Zone EST, show a financing program of **182 ha** for a amount assessed at **65 092 770 F CFA**. (Source: LBA / ZONE-EST, 2019).

III.2. Development forecasts and achievements (Year2 LM12):

The objectives of sowing are estimated at 35,345 hectares of which 30,000 hectares are reserved for rice cultivation, ie 85%.

Sources: BdD- Socio-economique SAED Final situation Hiv 18/19 & Weekly follow-up of Delegations Hiv 2019/20.

Harvests are practically completed on the whole of the Left Bank of the Senegal River. Provisional results yield surveys, for estimating rice production, are in progress.

On 147.65 ha are recorded in the area of Pété in Podor, flood disasters and 3.55 ha of abundance in Bakel.

Nevertheless, compared to the development of the previous wintering, all speculations combined, a jump of 8,140 ha are recorded for this 2019/2020 wintering campaign.
