I. The 2020_2021 wintering campaign

I.1. Financing of agricultural production:

Credit committees (1^{er} and 2th) of La Banque Agricole (North Zone) met, the volume of credit retained for the Financing of the Agricultural Production (FPA) of the winter season 2020_2021, is evaluated for an amount of **5.626 billion CFA francs** corresponding to a area equal to **18,468 hectares** (Source: LBA / ZONE-NORD, August 2020). The table below summarizes the overall summary of the results of the two credit committees.

Table 1: Summary of the results of the credit committees of LBA / North Zone of wintering 2020/2021

I.2. Development forecasts (An3 LM12)

The cultivation objectives are estimated at **46,130 hectares** including 40,000 ha reserved for rice cultivation, or 87%.

Table 2: Development forecasts and achievements for the wintering 2020_2021

Source: Hebdo follow-up, SAED delegations, au 08_Sept 2020.

Compared to the 2019_2020 wintering, over the same period, we note an increase of **1,913 ha**, i.e. an 8% increase in areas sown, all speculations combined.

However, delays are noted in terms of offsets and sowing in Dagana, where **11,950 ha** are fashioned against **12,430 ha** on the same date in HIV 2019/2020. This situation is mainly due to the difficulties of harvests, to the early rains caused during the month. last July. In fact, the harvesting / threshing operations for SSC 2020 took place, at the same time as the offsets and sowing. wintering 2020/2021.

I.3. Implementation of inputs

The installation of inputs takes place gradually at the various drop-off points. The first supplies of urea are being carried out in all production areas.

However, almost all the drop-off points are in deficit, with the exception of Matam where the implementation rate is 100% for urea and triple 15 and 87% for DAP.

In Dagana, the introduction of urea and DAP has started and corresponds respectively to this date at 45% and 43% compared to DRDR forecasts.

In Podor, the implementation rate of the DAP is 59.6% and the transfer rate evaluated at 46%, while in Bakel, the implementation of urea for this wintering campaign is still awaited. Arrangements must be made, in relation to the SDDR, to complete this gap as soon as possible.

I.4. Rainfall and hydrological monitoring

With the heavy rains recorded this weekend, the body of water has moved to **9.52 m** this September 08 at 8 a.m. on the Senegal River in Bakel, while on the Falémé in Kidira, the body of water was on the coast of **7.42 m**.

It should be remembered that the warning level at the Bakel station is 10 meters away.

II. The Hot Dry Season 2020:

II.1 Financing of agricultural production:

LBA Zone Nord credit committees (1^{er} and 2th) met, based on expressed needs of the order of **10.374 Billion F CFA** (equivalent to **27,066 ha**), the financing program selected by La Banque Agricole for the 2020 Hot Dry Season is **8.951 billion CFA francs** corresponding to an area of **23,975 hectares** (*Source: LBA / Zone Nord, 2020*).

In Bakel, the program adopted by La Banque Agricole to finance production is **1 425 388 F CFA** corresponding to an area of **six (06) ha** (*Source: LBA / Zone Est, 2020*).

Out of 14 files filed with the Matam CMS for an amount of **50 614 207 F CFA** corresponding to an area evaluated at **255.70 ha**, all are retained, i.e. a rate of 100% of the requests received (*Source: Weekly Tracking, Matam Delegation*).

II.2. Development forecasts (An3 LM12)

The development forecasts for SSC 2020, for the third year of implementation of LM12, are revised downwards and, they on 54,815 hectares of which 91% (50,000 ha) reserved for rice cultivation.

Table 3: Development forecasts and achievements for the Hot Dry Season 2020

Delegations	Forecast (ha)		Sowing / transplanting (ha)						Achievement rate.		Rice harvest	
	total	of which Rice	Rice	Okra	Potato	Peanut	Others	Total	Global	Of which rice	Sup. (in ha)	%

difference	415	0	3 384	116	56	78	549	4,182	7.	7.		

Source: Weekly Tracking, SAED Delegations, SSC, 2020.

98% of the surfaces are harvested, i.e. **48,526 hectares** on the whole of the Left Bank of the River Senegal.

In Dagana, in total **1,366 hectares**, or 4% of the development of the 2020 SSC are **disaster victims**. Of this, 43% are purely abandoned to because of the early and abundant rains and the insufficiency of combine harvesters adapted to this situation. The remaining 57% are affected by yield reductions due to damage caused by wild ducks, grain-eating birds, warthogs. AT this is added to the effect of early rains and drainage difficulties. It should also be noted that only 48% of these claims are insured by CNAAS, which corresponds to **649 hectares**.

III. The Cold Dry Season 2019_2020:

III.1. Financing of agricultural production:

1^{er} La Banque Agricole's credit committee (LBA / North Zone) met from 02 to 04 October 2019 in Matam, and the financing selected, for this Cold Dry Season 2019-2020 campaign, concerns an amount of **2.124 billion CFA francs**, corresponding to a area of **2,244 hectares (Source: LBA / Zone Nord, 2019)**.

The LBA credit committee (EST network) met on October 10, 2019 and the funding selected relates to an amount estimated at **11 714 862 F CFA**, that is to say an area equal to **23.62 ha** (LBA-East Zone).

In addition, the CMS regional committee met on November 5 and decided to finance the Kollangal locker up to **5,251,024 FCFA**, i.e. an area of **10.28 ha** for the Onion speculation (*Weekly Monitoring Nov-19, Bakel Delegation*)

III.2. Development forecasts and achievements (Year2 LM12):

Forecasts remain dominated by onion, industrial tomato and corn with respectively 41%, 20% and 17% of the objectives of enhancement revised.
