I. Update on the cold dry season 2020_2021

I.1. Preparing for the Cold Dry Season 2020_2021

The expressions of need for credit, from POs of Dagana, are listed and filed with the AML agencies of Saint-Louis and Richard-Toll, but also with Crédit Mutuel du Sénégal. Credit requests, for all types of speculation, amount to

1762.03 ha for an amount of CFAF 2.613 billion (Situation as of_29_09_2020).

Expressions of need are in progress in the other delegations.

I.2. Cold Dry Season Development Forecast 2020_2021

Development forecasts remain dominated by onion, industrial tomato and corn with 37%, 19% and 16% respectively development objectives of the twelfth engagement letter (LM 12).

Table 1: Development forecasts for the Dry Cold Season 2020_2021

Speculations	Dagana	Lake	Podor	Matam	Bakel	Valley
Tomato	1,016	150	2,300	225		3,691
Onion	960	1,300	3,800	800	300	7,160

II. The 2020_2021 wintering campaign

II.1. Financing of agricultural production:

Credit committees (1_{er} and 2_{th}) of La Banque Agricole (North Zone) met, the volume of credit retained for the Financing of the Agricultural Production (FPA) of the winter season 2020_2021, is evaluated for an amount of *5.626 billion CFA francs* corresponding to a area equal to *18,468 hectares* (Source: LBA / ZONE-NORD, August 2020).

II.2. Development forecasts (An3 LM12)

The cultivation objectives are estimated at 46,130 hectares including 40,000 ha reserved for rice cultivation, or 87%.

Table 2: Development forecasts and achievements for the wintering 2020_2021

Delegations	Forecast (ha)		Sowing / transplanting (ha)									Rate Real.	
	Total	of which Rice	Rice	But	Sorghum	Okra	Cassava	Peanut	Others	Total	Global	Rice

 ${\it Source: Weekly Tracking, SAED Delegations, as of _06_October_2020.}$

The development, for all speculations combined, amounts to **33,887 hectares**, i.e. an achievement rate of 73% of the enhancement for this current campaign. An augmentation of **2,131 ha** of the areas sown for rice is noted compared to the rice enhancement of the 2019/2020 rainy season (**28,372 ha**) at the same time.

II.3. Flood situation

Cases of flooding have been reported in production areas at certain perimeters.

In Podor, the persistence of rainfall has caused disasters in some plots. It should be noted however that some flooded areas are not entirely affected. In total, the flooded areas are estimated at 81.75 ha (Situation au_29_09_2020).

In Matam, the flooded areas are estimated at **165.5** ha of which **24.75** ha disaster victims. The main reasons for claims advanced are rainwater and flooding and, it can be seen that most of the flooded plots are cultivated with rice.

In Bakel, cases of disasters were reported at the Kollangal rice field, a mission made up of SAED, LBA and Union, took place on September 25, 2020 to ascertain the extent of the flooding and to assess the state of plants in the exposed plots, among others. Thus, the flooded area is estimated at 76.47 ha out of a total of 85.75 ha of sown areas. The insured area is estimated at 42 ha, including a flooded part of 35.90 ha.

II.4. Monitoring of vegetative state

In Bakel, the vegetative development of the crops is generally satisfactory: the rice is at the bolting stage for the first sowing; sorghum and chilli in the vegetative phase and the maize is at the start of harvest.

In Matam for the first wave, the crops are at the stemming stage to heading, at the end tillering stage to panicle initiation for the second wave and resumed tillering for the last wave.

In Podor, the establishment of crops is almost finished, the phenological stage is very heterogeneous because of the elasticity of the seedlings.

II.5. Implementation of inputs

The installation of inputs takes place gradually at the various drop-off points.

In Matam, the placement rate is 100% for urea and triple 15 and 89.1% for DAP. The cession rates are respectively 77.16% for DAP, 88.6% for urea and 68.1% for triple 15.

In Podor, the placement rate is 99% for urea and 95.4% for DAP. At the same time, the disposal rates, for urea and DAP, are respectively 98.4% and 95.4% (DRDR: Situation au_29_09_2020).

In Dagana, the introduction of urea and DAP has started and corresponds respectively to this date at 45% and 43% compared to DRDR forecasts (situation at 22_09_2020).

III. The Hot Dry Season 2020:

III.1 Financing of agricultural production:

LBA Zone Nord credit committees (1_{er} and 2_{th}) met, based on expressed needs of the order of **10.374 Billion F CFA** (equivalent to **27,066 ha**), the financing program selected by La Banque Agricole for the 2020 Hot Dry Season is **8.951** billion CFA francs corresponding to an area of **23,975** hectares (Source: LBA / Zone Nord, 2020).

In Bakel, the program adopted by La Banque Agricole to finance production is **1 425 388 F CFA** corresponding to an area of *six (06) ha (Source: LBA / Zone Est, 2020).*

Out of 14 files filed with the Matam CMS for an amount of **50 614 207 F CFA** corresponding to an area evaluated at **255.70 ha**, all are retained, i.e. a rate of 100% of the requests received (*Source: Weekly Tracking, Matam Delegation*).

III.2. Development forecasts (An3 LM12)

The development forecasts for SSC 2020, for the third year of implementation of LM12, are revised downwards and, they on 54,815 hectares of which 91% (50,000 ha) reserved for rice cultivation.

Table 3: Development forecasts and achievements for the Hot Dry Season 2020

Delegations	Forecast (ha)				Achievement rate.					
	total	of which Rice	Rice	Okra	Potato	Peanut	Others	Total	Global	Of which rice

IV. The Cold Dry Season 2019_2020:

IV.1. Financing of agricultural production:

1_{er} La Banque Agricole's credit committee (LBA / North Zone) met from 02 to 04 October 2019 in Matam, and the financing selected, for this Cold Dry Season 2019-2020 campaign, concerns an amount of *2.124 billion CFA francs*, corresponding to a area of *2,244 hectares* (*Source: LBA / Zone Nord, 2019*).

The LBA credit committee (EST network) met on October 10, 2019 and the funding selected relates to an amount estimated at *11 714 862 F CFA*, that is to say an area equal to *23.62 ha* (LBA-East Zone).

In addition, the CMS regional committee met on November 5 and decided to finance the Kollangal locker up to *5,251,024*FCFA, i.e. an area of 10.28 ha for the Onion speculation (Weekly Monitoring Nov-19, Bakel Delegation).

IV.2. Development forecasts and achievements (Year2 LM12):

Forecasts remain dominated by onion, industrial tomato and corn with respectively 41%, 20% and 17% of the objectives of enhancement revised.
